## Data Definitions

### Date Format

All dates should be formatted as "YYYY-MM-DD".

### XML version Element

The XML version element should be identical to the value in the current schema downloaded from [www.anccmagnet.org](http://www.anccmagnet.org).

```
<?xml version="1.0" encoding="utf-8"?>
```

### Report Element

The Report element is the wrapper for the entire XML file and defines the file as a report to the DDCT system. Embedded in the Report element are the following attributes:

- xmlns:xsi – <http://www.w3.org/2001/XMLSchema-instance>
- xmlns:xsd – <http://www.w3.org/2001/XMLSchema>
- VersionStamp – use the value listed in the current schema
- xmlns – <http://ancc.org/DDCT/Import>

### Organization Element

The Organization element provides details about the organization. Each report must have one and only one organization element. Embedded in the Organization element are the following attributes:

Attribute	Required	Notes
Name	Y	Max 200 characters
Address	N	Max 200 characters
City	N	Max 120 characters
State	N	See list of States below
PostalCode	N	Max 10 characters
Country	N	
Phone	N	Max 50 characters
WebSite	N	Max 500 characters
OwnershipType	N	See list of OwnershipTypes below
LocationType	N	See list of LocationTypes below
TeachingStatus	N	See list of TeachingStatus codes below
OrganizationType	N	See list of OrganizationTypes below
OtherOrganizationType	N	Max 100 characters
Subspecialty	N	

### Units Element

The Units element lists all hospital units which are included in the report. Within the Units element are individual Unit elements, which have embedded in them the attributes for Unit Type and Name. See below for the list of valid Unit Type values.

```
<Units>  
  <Unit Type="A" Name="Unit 1" />  
  <Unit Type="B" Name="Unit 2" />  
</Units>
```

### GeneralInformation Element

The GeneralInformation element contains details which appear on the General Information page of the report. Embedded in the GeneralInformation element are the following attributes:

Attribute	Required	Data Limitations
Year	Y	Integer
DueDate	Y	Date
CMSProviderNumber	N	Max 20 characters
AHANumber	N	Max 20 characters
CNODate	Y	Date when CNO started

		employment

#### CNO Element

Within the GeneralInformation element is the CNO sub-element, which has embedded in it the following attributes, all of which are optional:

- Name (max 200 characters)
- Email (max 400 characters)
- Phone (max 50 characters)

#### MPD Element

Within the GeneralInformation element is the MPD sub-element, which has embedded in it the following attributes, all of which are optional:

- Name (max 200 characters)
- Email (max 400 characters)
- Phone (max 50 characters)

#### ReportingPeriod Element

Within the GeneralInformation element is the ReportingPeriod sub-element, which has embedded in it the following required attributes:

- Start (start date of reporting period)
- End (end date of reporting period)

#### DemographicsMatrix Element

The DemographicsMatrix element contains one "Answers" sub-element. All of the individual answer data points are contained within the Answers sub-element like so:

```
<DemographicsMatrix>
  <Answers>
    <Answer...../>
    <Answer...../>
  </Answers>
</DemographicsMatrix>
```

#### Answer Element

Each Answer element has embedded in it the following attributes:

Attribute	Required	Data Limitations
Question	Y	See list of Questions below
Certification	Only for certain questions.	See list of Certifications below
UnitName	Y	Name must match one of the Unit Names included in the Unit element
Value	Y	Decimal

#### Questions with Certification Required

For questions where a certification is required, Answer should be formatted:

```
<Answer Question="XX" Certification="XX" UnitName="XX" Value="XX" />
```

#### Unique Answer values

Answers must contain a unique combination of Question ID, Hospital Unit, and Certification (if applicable). For example, this will generate an error, because the same Question and UnitName are used on more than one Answer:

```
<Answer Question="Q76" UnitName="Unit 1" Value="5.88" />
```

```
<Answer Question="Q76" UnitName="Unit 1" Value="6.5" />
```

## Question

Value	Description	Certification Required?
Q1	Utilization of Organization Services: Number of Staffed Beds - The number of beds that the organization staffs at any given time to receive an expected patient population.	N
Q2	Utilization of Organization Services: Number of Visits to Ambulatory Clinics - The variety of data elements collected by various systems makes inclusion and exclusion criteria unrealistic. Organizations report the data available to them. These visits include visits by inpatients as well as outpatients.	N
Q3	Utilization of Organization Services: Number of Home Visits Scheduled - Include home care visits. This question is optional for inpatient organizations.	N
Q4	Utilization of Organization Services: Number of Procedures Performed - Workload performed by ambulatory staff in clinics or on bedded units, e.g. wound care performed in a same day surgery unit. Include procedures	N

	performed by other nursing areas/departments such as wound care, diabetic education, etc. This question is optional for inpatient organizations.	
Q5	Utilization of Organization Services: Number of Phone Contacts - These include follow-up calls, triage, appointment reminders, etc. made by nursing personnel. This question is optional for inpatient organizations.	N
Q6	Utilization of Organization Services: Number of Letter\Email Contacts - These include appointment reminders, results of studies/labwork, etc. made by nursing personnel. This question is optional for inpatient organizations.	N
Q7	Clinical Nurses (other than APNs): FTEs Budgeted - The number of full time equivalents/whole time equivalents (European) the organization anticipated needing during the year.It is the hiring goal.If there are trends related to opening or closing beds, etc.This should be annotated in the notes section.	N
Q8	Clinical Nurses (other than APNs): FTEs Actual - The actual FTEs is the FTEs of staff available to fill the budgeted positions. It can include both full-time and part-time positions. Provide the average of FTEs for the year. If a strong trend has occurred during the year, the value more representative of the unit. It is not the worked hours. If there are trends related to opening or closing beds, etc. this should be annotated in the notes section. Calculate one FTE as equivalent to 2080 hours per year.	N
Q9	Clinical Nurses (other than APNs): FTEs Greater Than 2 Years Experience in Current Specialty - This is used as the denominator for the calculation of the certification rate for direct care nurses.Limiting the pool to those who are typically eligible to sit for a certification examination focuses on the success of the organization’s program(s) for supporting professional certification.The certification rate is then not “diluted” by successful programs for recruiting novice nurses.	N
Q10	Clinical Nurses (other than APNs): FTEs Float Pools\Perdiem - These FTEs are not included in the actual employed numbers.	N
Q11	Clinical Nurses (other than APNs): Turnover Rate - This is a raw rate.This allows direct comparison of organizations by avoiding the variability of calculation by Human Resource departments.It is calculated as the number of FTEs that resigned, retired, expired or were terminated divided by the number of FTEs actual during the same period.Per diem (those that float to numerous units), agency, supplemental, and travelers are not included.Turnover within an organization or within organizations that apply as a system is not included in this calculation.	N
Q12	Licensed Practical/Vocational Nurse: FTEs Budgeted - The number of full time equivalents/whole time equivalents (European) the organization anticipated needing during the year.It is the hiring goal.If there are trends related to opening or closing beds, etc.This should be annotated in the notes section.	N
Q13	Licensed Practical/Vocational Nurse: FTEs Actual - The actual FTEs is the number that is of staff to fill the budgeted positions. It can include both full-time and part-time positions. Provide the average of FTEs for the year. If a strong trend has occurred during the year, the value more representative of the unit. It is not the worked hours. If there are trends related to opening or closing beds, etc. this should be annotated in the notes section. Calculate one FTE as equivalent to 2080 hours per year.	N
Q14	Licensed Practical/Vocational Nurse: FTEs Departed - The following are included: 1) A resignation of an FTE that results from an issue or environmental feature or trait that is under the control of the employer. Examples of “controllable resignation” would be those occurring as a result of pay status, ability to advance, perceived lack of respect, or job injuries covered. 2) A resignation of an FTE that does not result from an issue or environmental feature or trait that is under the control of the employer. Examples of “uncontrollable” resignations would be those occurring as a result of the nurse’s spouse’s relocation, a family illness, or retirement secondary to age. 3) Cessation of employment effected by the organization, irrespective of the preference of the employee.
